About

Unity Game Developer

Passionate C# programmer and game design enthusiast specializing in 2D, 3D, and Augmented Reality experiences built on the Unity Engine. Driven to transform abstract ideas into fully realized, playable realities for users globally.

2D Games

3D Games

AR Experiences

**C#
Programming**

Top Skills

Game Programming

Designing and implementing gameplay mechanics, level design, and engaging player experiences from the ground up.

Unity Technologies

Proficient in Unity Engine for building scalable, high-performance games across PC, Mobile, and Web platforms.

C# Development

Writing clean, robust C# code architectures that power seamless gameplay loops and modern UI/UX layouts.

Quantz Games

FOUNDER & SOLO DEVELOPER

JULY 2026 – PRESENT

Quantz Games is an independent studio crafting immersive 2D, 3D, and AR titles powered by Unity. Built on deep-rooted passion, the studio focuses on clean C# programming, robust gameplay mechanics, creative level design, and seamless user experiences — pushing the boundaries of modern indie game design.

PC, Mobile & Web

Scalable C# Architecture

**Immersive AR
Environments**

X Beaters

FOUNDER & SOLO DEVELOPER

NOVEMBER 2025 – PRESENT

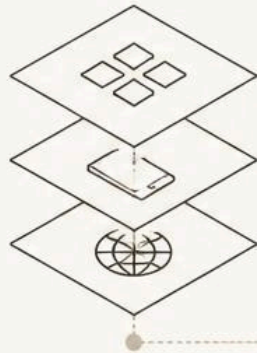

As Founder and Solo Developer at X Beaters, Muhammad designs and develops indie games using the Unity engine — covering gameplay programming, level design, and creating engaging experiences from scratch. Passionate about coding and bringing creative game ideas to life.

Core Responsibilities

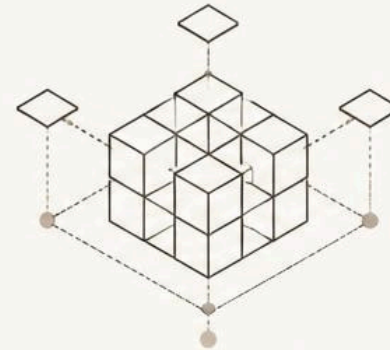

- Gameplay programming
- Level design
- End-to-end Unity development
- Creative concept execution

Development Focus Areas

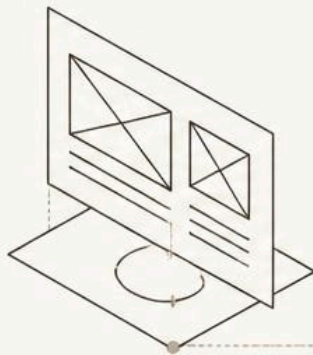

Across both studios, development work spans the full game creation pipeline — from initial concept and C# architecture through polished, playable releases.

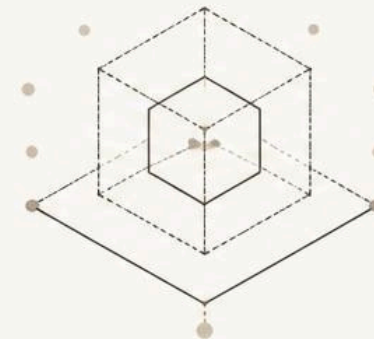

Indie Game Development
(PC, Mobile, Web platforms)

C# Code Architecture
(scalable mechanics and systems)

UI/UX & Gameplay Loops
(modern layouts and core loops)

AR & Real-time Environments
(immersive augmented reality experiences)

Certifications

Google Certifications

Recognized credentials from Google validating technical and professional competencies.

Google Play Academy

Store Listing Certificate — expertise in optimizing and publishing apps on Google Play.

Unity Essentials

Foundational certification demonstrating proficiency with the Unity game engine.

Education

Sir Syed College, Wah Cantt

High School — Computer Science

Academic Background

Long-term student at Sir Syed School and College, Wah Cantonment, with a focus on Computer Science. Balancing formal education alongside hands-on game development work in Unity and C#.

Portfolio & Online Presence

Portfolio

Explore completed projects, game demos, and development work showcasing Unity 2D/3D and AR capabilities.
